

**Bas de Bruin** studied chemistry at the University of Nijmegen from 1989-1994. He obtained his Ph. D. (April 20, 1999) from the same university. After some post-doctoral experiences, he returned to the University of Nijmegen as an Assistant Professor in Inorganic Chemistry. He moved to the University of Amsterdam in 2005, where he was promoted to Associate Professor in 2008). He was promoted to Full Professor at the same university in 2013. Bas de Bruin presently focuses at the development of new tools in homogeneous catalysis, using metals in unconventional oxidation states and unconventional ligands, specifically aiming at the development of new catalytic organic reactions.
