

Carlo Nervi after a brief period in the J. Heyrovský Institute of Physical Chemistry (Prague, CZ), developed his career in Torino University working in the field of Organometallic and Inorganic Electrochemistry. He is author of more than 100 papers in scientific journals and a monograph (“Inorganic Electrochemistry”, RSC, 2011). His scientific interests include electrochemistry, batteries, DFT calculations in solution and in the solid state, and organometallic complexes for energy applications and CO₂ reduction.
