

Angela Dibenedetto is Full Professor at the University of Bari-UNIBA (IT) – Department of Chemistry. Her scientific interests are focused on carbon dioxide utilization in synthetic chemistry, catalysis, coordination chemistry and organometallic chemistry, green chemistry, marine biomass (algae) production by enhanced carbon dioxide fixation, marine biomass as source of fuels and chemicals applying the Biorefinery concept.

Actually she is director of the Interuniversity Consortium on Chemical Reactivity and Catalysis-CIRCC. Author of over 150 scientific papers published in international Journals since 1995 and several book Chapters. She was Invited speaker at several International conferences.

Current h-index is 37 with over 5858 citations (Google Scholar).
