

Prof. Mizuki Tada was received her Ph.D. at the department of chemistry, the University of Tokyo in 2005. She became an assistant professor at the University of Tokyo and moved to Institute for Molecular Science as an associate professor in 2008. She is a professor of chemistry at Nagoya University since 2013. Her research interests are the design of supported metal complexes, heterogeneous catalysis, and operando imaging of solid materials and fuel cells.
