

Vito Lippolis graduated in Chemistry in 1991 at the University of Pisa (Italy) and in the same year gained the diploma in Chemistry at the “Scuola Normale Superiore” of Pisa. In 2000 he received his PhD degree from the University of Nottingham (UK) under the supervision of Professor Martin Schröder. In 2001 was appointed to the chair of inorganic chemistry at the University of Cagliari (Italy). He has published about 290 publications and numerous book chapters (H-Index 42 from Scopus). His research interests at the moment mainly include: supramolecular chemistry and crystal engineering, coordination chemistry of macrocyclic ligands and development of molecular sensors and ionophores for heavy metal ions and anions, luminescent materials, reactivity of chalcogen donor molecules towards halogens and inter-halogens. He is Member of the International Advisory Board of the International Conference on the Chemistry of Selenium and Tellurium (ICCST).
