

Dmitry Yakhvarov was born in 1974 in Kazan, Russian Federation. He graduated the Department of Physical Chemistry of Kazan State University in 1996 with excellent marks. He got his Ph.D. (Candidate of Sciences) in February 2000 and became a Dr. habil. (Doctor of Sciences) in 2012. Since 1995 he is a Chief Scientist of Arbuzov Institute of Organic and Physical Chemistry of the Federal Research Center “Kazan Scientific Center of Russian Academy of Sciences” and head of the Laboratory of Organometallic and coordination compounds. Dmitry Yakhvarov is a specialist in phosphorus, physical, inorganic, coordination and organoelement chemistry, catalysis and electrochemistry.

His main research interests are focused on the development of new technologies for the preparation of organophosphorus and organoelement compounds, including organometallics, by electrochemical methods based on the principles of “green chemistry”. In 2016 he was awarded the honorary title of “Professor of the Russian Academy of Sciences”.
