

Dr. Jing-Lin Zuo is Full Professor in Nanjing University, China. He has been the Cheung Kung Scholar of Ministry of Education, China (since 2009) and Director of State Key Laboratory of Coordination Chemistry in Nanjing University (Since 2010).

His research interests are focused on functional coordination chemistry and organometallic chemistry, including: (1) Molecular conductors and conductive metal-organic frameworks; (2) Multifunctional magnetic materials, such as single molecule magnets, magnetic semiconductors, and spin-crossover materials; (3) Electro-optical conversion materials (OLEDs); (4) Functional self-healing materials based on coordination bonds. He has published about 300 peer reviewed articles. He is currently the Associate Editor of *ACS Omega*, and the Editorial Board Member of *Sci. Chin. Chem.* and *Chin. J. Inorg. Chem.*
