

Paola Ceroni is full professor at the University of Bologna. In 1998 she obtained her PhD degree in Chemical Sciences at the University of Bologna. Current research is focused on photochemistry and electrochemistry of supramolecular systems with particular emphasis towards luminescent nanocrystals.

Her research on luminescent silicon nanocrystals was funded by an ERC Starting Grant PhotoSi (2012-2017) and an ERC Proof of Concept SiNBiosys (2017-2019).

She is co-author of a book entitled: "Photochemistry and Photophysics : Concepts, Research, Applications" (2014, Wiley-VCH) and the editor of three books published by Wiley and Springer. She is fellow of the Royal Society of Chemistry. She has presented oral communications at more than 70 national and international conferences and 30 invited lectures.
