

**Sven Schneider** (\*1972) is full professor and managing director of the Institute for Inorganic Chemistry at the University of Göttingen, Germany. His research interests are focused on catalysis, the activation of small molecules (particularly N<sub>2</sub>, CO<sub>2</sub> and H<sub>2</sub>) for chemical synthesis and sustainable energy storage, and gas phase deposition of inorganic materials.

He is vice-chair of the collaborative research center SFB1073 and received an ERC Consolidator Grant in 2015. He currently serves on the editorial board of *Structure and Bonding*.
